The fastest migration on the market

Whatever the size of your business, migrate in the most efficient way possible

SAAS Platform build on top of Azure

Improved business agility with zero local deployment

Self-service platform

Simplifies and accelerates your purchasing process

FILE MIGRATION

Simplify and automate migration of business content using Clouidiway file migration for Google Drive, OneDrive for Business and SharePoint Online

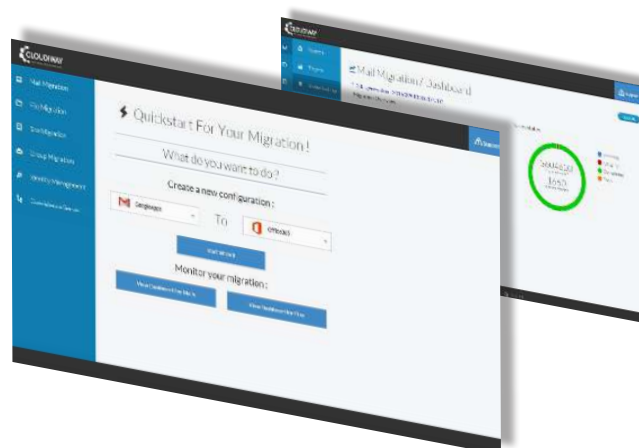

Transferring files from one cloud storage service to another might sound adventurous, but rest easy, you don't need to be an expert. Clouidiway puts all of your data in one place without data degradation.

There is no hardware to deploy or software to install, simply use an internet connection and a web browser for migrating your business content. Clouidiway also does the hard work for you. It preserves existing files and permissions and automatically converts document formats between Google Apps and Office 365.

What about my shared files?

Clouidiway handles migration according to heterogeneous environment restrictions. Documents shared on Google Drive can be migrated to OneDrive for business or SharePoint depending on how they've been shared. We also provide flexible options to ensure files remain easy to locate.

Clouidiway makes migration easy by leveraging the latest technology to drive a seamless transition without needing the credentials of all your business users.

File migration uses the same user-friendly platform as mailboxes migration so you can perform concurrent migrations to your new cloud-based system.

Google Sites

Site Collection Migration
Migrate your Site Collections

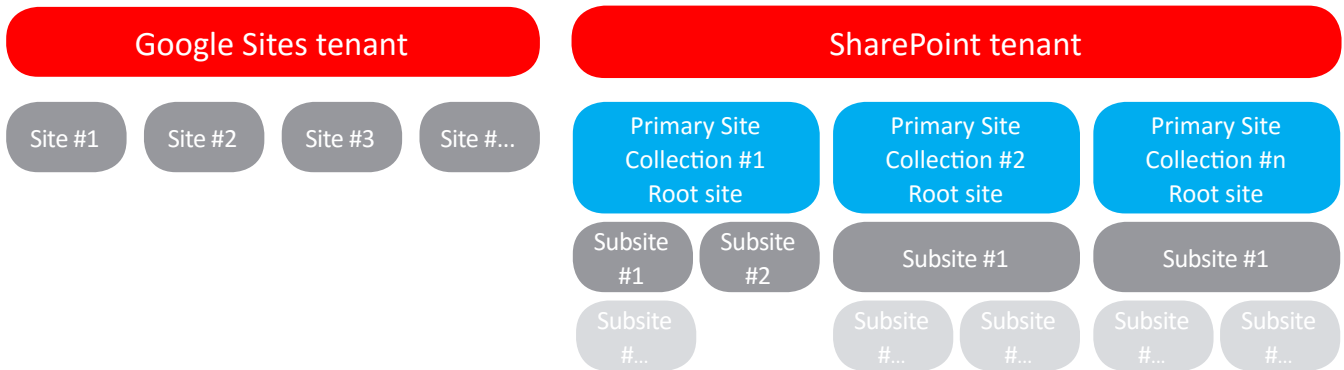

Supported Sources
Sharepoint On Premises
Sharepoint Online
Google Sites

SAAS Platform build on top of Azure
Improved business agility with zero local deployment

SITES MIGRATION

Cloudiway is the only SaaS platform capable of offering a simple and seamless solution for migrating Google Sites to SharePoint On Prem/Online or SharePoint to SharePoint online.

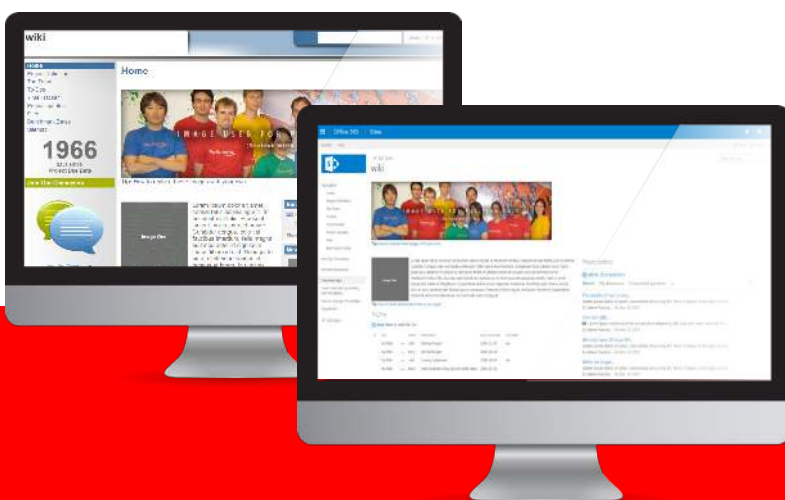

Google Apps for Work and Office 365 are very distinct, especially when migrating Google Sites to SharePoint Online.

During migration Cloudiway integrated SharePoint's broad features and flexible document management options.

Cloudiway eliminates the ambiguity and definitional differences between Google Sites and SharePoint. We migrate all data and maintain all permissions by saving metadata with no duplicate content.

Monitor every step of your the migration from your web browser using our SaaS application. Cloudiway will do the hard work whether you're migrating from Google Sites to Sharepoint Online or Sharepoint Sites between Office 365 tenants.

We provide an intuitive platform that clones with full-fidelity your architecture and data including configuration, sites and subsites, permissions, files, lists and libraries to your target Sharepoint online environment.

Simplify complex scenarios with market-leading software from Cloudiway®. Our cloud-based software saves you time, money and resources

ADVANTAGES AND BENEFITS

SAAS Platform build on top of Azure

Improved business agility with zero local deployment

Supports all migration strategies

Batch, phased or big bang

High availability

99.9% guaranteed availability

Minimizing disruption

Mitigates business risk

SHARE A DOMAIN BETWEEN OFFICE 365 TENANTS

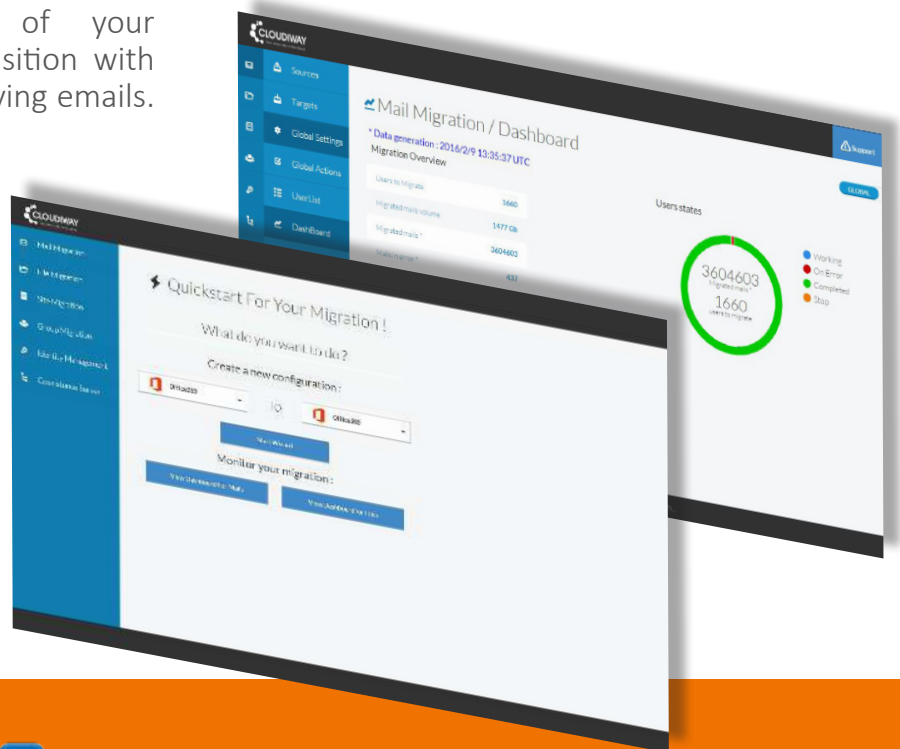

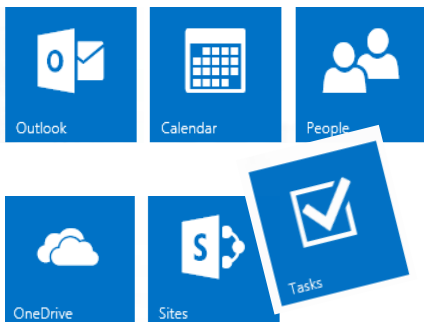

Migrating mailboxes and service settings from one Office 365 tenant to another during a business merge scenario might sound a bit complex. But with Cloudiway it is not.

Cloudiway provides a solution to a variety of problems ranging from the simple, such as moving from syndicated tenants, to the complex, such as company consolidation through a merger, acquisition, or division. In every situation, the need to keep the business running successfully during such a transition is paramount. Cloudiway handles projects of any size with zero user downtime that will let you migrate an entire domain and be confident in the complete availability of your messaging system during the transition with transparency for sending and receiving emails.

Cloudiway achieves what others class as impossible.

We can implement a robust mechanism to control mail routing and delivery for different organizational units without necessarily performing a migration to a single domain.

Our user friendly SaaS platform helps you strengthen your infrastructure and perform migrations of mailboxes, documents, archives and SharePoint sites from one Office 365 tenant to another Office 365 tenant.

COEXISTENCE BETWEEN GOOGLE APPS AND OFFICE 365

THE ONLY SOLUTION FOR SOLVING COMPLEX SCENARIOS OF CONSOLIDATION, MERGERS AND ACQUISITION

FEATURES

Calendar free/busy

Instantly view the availability of users rooms and equipment and easily schedule and update

GalSync Automated sync

Galsync automatically processes users contacts and groups in both environments

Mail Routing Platform

Share a domain name between Office 365 and Google and avoid issues of sending emails to users in the other system

ADVANTAGES AND BENEFITS

SAAS Platform build on top of Azure

Improved business agility with zero local deployment

Scalable

Grant subscription to all users or defined groups

Retain full interoperability

Ensure coexistence during large migration or for long-term coexistence

Integration

Fully integrated into Outlook, OWA and Google calendar

CROSS PLATFORM COLLABORATION

Cloudiway coexistence respond to the many challenging and complex scenarios encountered by large companies on a daily basis: mergers, and acquisitions and other significant changes within companies' information systems.

How to check the availability of colleagues that use different messaging systems?

How to share a domain name between two systems?

How sync address books between Google and Office 365?

Cloudiway Coexistence provides full interoperability between Google Apps for work and Exchange or Office 365. Cloudiway Coexistence enhances cross-platforms communication with no impact on day- to-day operations.

Users can collaborate with immediate details of free/busy information for a user, room or equipment.

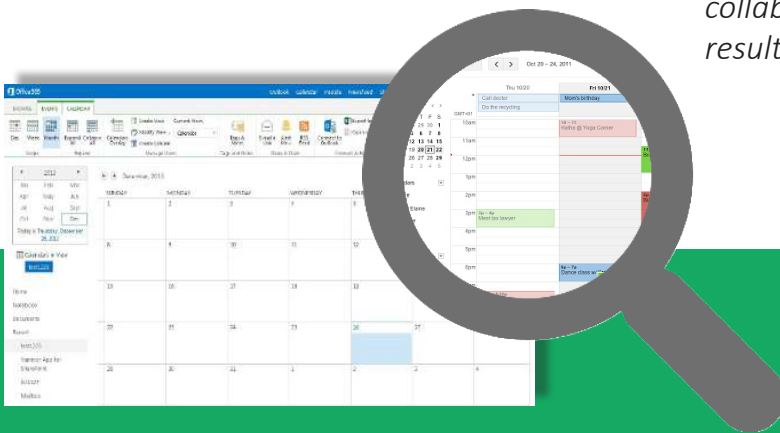

Sharing a domain between two system has never been so easy, with complete availability of the messaging system with transparent mail routing where users can communicate with each other as if they were using a single domain.

Additionally, address books are automatically synchronized in order to keep global address lists up to date in both environments.

A seamless way to migrate users from one environment to another or when organizations need to coexist on multiple platforms over a period of time.

"Cloudiway solves an important business problem for us by allowing Acxiom® Office 365 users to effectively work with and schedule meetings with Google users in our subsidiary company. It's invisible to the end-user, but the benefits have greatly reduced the back-and-forth communication necessary for collaboration and enabled better business results."

Kevin Jordan, Director of IT - Acxiom®
